## Wristband alarm travel kit – for home & abroad

The Splash! Wireless wristband alarm is easy and convenient to use and operate. When the Wrist Band is immersed in water, the Base Station Alarm will sound and it will flash at the same time, both to attract attention and help alert those who may be hard of hearing.

The Splash! wristband alarm informs you immediately the first moment your child falls into water, with its loud 100Db alarm.

The Splash! wristband Alarm is suitable for use where there is any form of water hazard, both at home and abroad, whether this be the sea, swimming pool, paddling pool, garden pond, river or other area of unguarded water.

The base station has a wireless range of over 150 feet.

**PLEASE NOTE:** Image shows UK plug adapter. Travel kits are shipped with local country adapters.

### **IMPORTANT.**

Your Splash! wristband alarm is not a substitute for diligent supervision or Pool Access Safety Barriers. It has been designed as a 'last line of defence' to help prevent the accidental drowning of children. It is not a 'rescue device' and every effort should be made to keep your children in sight at all times

## In-Pool alarm

This simple, yet extremely effective In Pool alarm, provides an essential early warning system for your pool, for both security and peace of mind.

### Features

- Simple and easy to use
- Installation in 5-10 minutes
- Loud 100Db alarm
- Dual alarm, from pool unit and remote receiver
- Wireless range 300ft in the open
- Magnetic key de-activation
- Meets French safety standard NF90-307

The Splash! Pool Protector alarm is a portable, self-contained, light weight unit that is safe and simple to operate. Entry into your pool will be detected by the unit's electronic sensor, triggering a loud pulsating alarm.

The alarm will sound both in the pool unit (at the pool side) and the remote unit (in your home or pool house). The range of the remote unit is approximately 300 feet in open space.

The Splash! Pool Protector is quickly and easily controlled with the magnetic key. This controls the alarm by setting the work mode, stop or sleep mode, and reset mode.

This product has been designed to aid in the detection of unwanted intrusions into unsupervised pools. The Splash! Pool Protector alarm is a safety system, and not a life saving device.

### Note

This alarm is not intended to replace any other safety consideration, such as adult supervision, lifeguards, fences, gates, pool covers, locks, etc.

Features:  
Installation in 5-10 minutes  
100Db alarm  
Alarm at poolside and remote station  
Simple magnetic key operation  
Requires standard 9v battery (not included)
